### 2.TOBACCO AWARENESS PROGRAM

S.No	Date	Name of the activity	Place of activity
2	31.05.2022	Tobacco Awareness Program	Sengunthar Engineering College (Autonomous), Tiruchengode

The Member States of the World Health Organization created World No Tobacco Day in 1987 to draw global attention to the tobacco epidemic and the preventable death and disease it causes. In 1987, the World Health Assembly passed Resolution WHA40.38, calling for 7 April 1988 to be "a world no-smoking day." In 1988, Resolution WHA42.19 was passed, calling for the celebration of World No Tobacco Day, every year on 31 May.

According to the National Institute on Drug Abuse, the nicotine in any tobacco product readily absorbs into the blood when a person uses it. Upon entering the blood, nicotine immediately stimulates the adrenal glands to release the hormone epinephrine (adrenaline). Epinephrine stimulates the central nervous system and increases blood pressure, breathing, and heart rate. As with drugs such as cocaine and heroin, nicotine activates the brain's reward circuits and also increases levels of the chemical messenger dopamine, which reinforces rewarding behaviors. Studies suggest that other chemicals in tobacco smoke, such as acetaldehyde, may enhance nicotine's effects on the brain.

Although nicotine is addictive, most of the severe health effects of tobacco use comes from other chemicals. Tobacco smoking can lead to lung cancer, chronic bronchitis, and emphysema. It increases the risk of heart disease, which can lead to stroke or heart attack. Smoking has also been linked to other cancers, leukemia, cataracts, and pneumonia. All of these risks apply to use of any

5	21.06.2022	International Yoga Day 2022	Kongu Engineering College,Perundurai,Erode

Yoga is the dance of every cell with the music of every breath that creates inner serenity and harmony. International Yoga Day 2021 will be observed on June 21 this year to highlight the importance of Yoga and the pivotal role it plays in rejuvenating our mind and the body, leading to a healthier lifestyle. Yoga not only provides physical and mental relaxation but also develops strength and resilience. The numerous benefits of Yoga make it a popular practice for people across the globe, especially in times of a pandemic when mental and physical health is under stress. According to the UN website, the theme for International Yoga Day 2022 is 'Yoga for well-being.

Our Prime minister termed Yoga as an 'invaluable gift of India's ancient tradition' and highlighted the importance of yoga for maintaining 'harmony between man and nature'. The draft resolution passed by India was backed by 177 nations and the first International Yoga Day was celebrated on June 21, 2015. The idea for an UN-mandated International Day of Yoga was first proposed by Prime Minister Narendra Modi during his speech at the United Nations General Assembly (UNGA) in 2014. In his speech, Prime Minister called Yoga an "invaluable gift of India's ancient tradition" and called for the "harmony between man and nature" through Yoga.

Yoga plays an important role in the psycho-social care and rehabilitation of COVID-19 patients in quarantine and isolation. As per the website, the message of Yoga in promoting both the physical and mental well-being of humanity has never been more relevant. The World Health Organization (WHO) has also asked its member states to practice Yoga and has included it in its Global Action Plan for physical activity 2018-30. Practicing asanas and Pranayama regulates the purification of the internal system of the organs. The energy generated in the body through these physical exercises is then channeled into meditation for peace, stability and calm. This year International yoga day has been conducted in Kongu Engineering College Camp area as a part of Combined Annual Training Camp around 200 cadets, PI Staffs, Associate NCC Officers, Caretaker Officers, Caretakers have actively participated in the program of celebrating Yoga Day and performed yogasanas.

Organizations have several options to increase their competitiveness, they can strive for price leadership or develop a strategy of differentiation. In both cases, innovation is essential.

- Companies that choose price leadership must secure their long-term competitiveness by developing innovative, highly efficient processes. Process optimization and continuous improvement in terms of costs are important for them.
